PROFESSIONAL SUMMARY

Open Stack Developer (CGPA 3.79/4.00) with hands-on experience building Django & MERN with MVC architecture, REST API integration, and offline-first design for real-world markets. Currently interning as a Software Engineer at LabS23 Tech, working across Open Stack development and backend services. Combines mobile development with a strong data engineering foundation (Kafka, Airflow, PostgreSQL) to build full-stack, data-driven mobile solutions.

TECHNICAL SKILLS

Languages	Kotlin · Java · Python · SQL
Android Development	Android Studio · MVVM Architecture · XML Layouts · Fragments & Activities · RecyclerView · REST API Integration · SQLite
Cross-Platform Mobile	React Native
Web & Backend (MERN)	MongoDB · Express.js · React.js · Node.js
Backend & APIs	Django · REST APIs · PostgreSQL · MySQL
Pipeline & Data (secondary)	Apache Kafka · Apache Airflow · ETL/ELT Pipeline Design · Data Modeling
DevOps & Tools	Docker · Git · GitHub · Postman · VS Code · pgAdmin

EXPERIENCE

LabS23 Tech · Lahore, Pakistan

Junior Software Engineer Aug 2025 – Present (1 year)

→ Promoted from intern to Junior Software Engineer, working across Android (Kotlin/Java), **React Native**, Django and the **MERN stack** (MongoDB, Express.js, React.js, Node.js) for mobile and web-facing features.

→ Owned feature development and API integration end-to-end, from requirements through implementation, testing, and bug fixes, in a production codebase.

→ Collaborated with the engineering team using Git/GitHub for version control and standard code review practices.

Software Engineer Intern Apr 2025 – Aug 2025 (4 months)

→ Worked across Android (Kotlin/Java) and React Native mobile development alongside backend engineering tasks in a mixed mobile + backend role.

→ Built and maintained features using the Django & MERN stack (MongoDB, Express.js, React.js, Node.js) for web-facing components and APIs.

→ Contributed to feature development, API integration, and bug fixes as part of a collaborative software engineering team.

PROJECTS

Asaan Karobar – Final Year Project **Android Development & Data Engineering** 2025 – Present

Stack: Kotlin · Android · Apache Kafka · Apache Airflow · MinIO · PostgreSQL · Python · Django · REST APIs · Docker

→ **Developed a Kotlin/MVVM Android app** with Urdu-language support and offline-first architecture for Pakistani SMEs, integrated with Kafka/Airflow for real-time transaction processing.

→ Built the Android UI/UX layer end-to-end and connected it to **Django REST APIs** powering live business KPI dashboards.

→ Orchestrated Airflow DAGs for daily CSV log ingestion, processing, and cleaning into PostgreSQL.

→ Implemented Python validations to ensure referential integrity across production-ready tables.

Grocify – Grocery Delivery App **Android Development**

Stack: Java · Android · XML · SQLite · REST APIs

→ **Designed and developed an end-to-end Android grocery delivery app** for the Pakistani market, covering product catalog browsing, search, cart management, and checkout.

→ Built the app's core screens (product listing, product detail, cart, and order flow) in Java with XML layouts, following standard Android Activity/Fragment architecture.

→ Integrated **REST APIs** for product catalog and order data, with **SQLite** used for local data persistence.

→ Added Privacy Policy and Terms & Conditions screens to bring the app in line with Play Store compliance requirements.

→ Diagnosed and fixed a cart/checkout crash (ClassCastException from a TextView/Button mismatch), stabilizing the order flow.

E-Commerce & Ride-Sharing Analytics Pipelines **Data Engineering**

Stack: Python · SQL · PostgreSQL

→ Modeled star schemas and fact/dimension tables for high-performance BI reporting; standardized multi-source customer and order records.

→ Transformed large trip datasets into organized schemas for time-series analysis and identified peak demand trends using SQL window functions.

EDUCATION

BS Software Engineering COMSATS University Islamabad, Sahiwal Campus · Final Year – 8th Semester

Expected: July 2026

→ **CGPA: 3.79 / 4.00**

→ **Relevant Coursework:** Android Development · Object-Oriented Programming · Data Structures & Algorithms · Design Patterns · Database Systems · Programming Fundamentals · Web Development · Machine Learning · Artificial Intelligence

CERTIFICATIONS

SQL Fundamentals · DataCamp
Data Science Professional · DataCamp
Python Programming · DataCamp
Advanced SQL for Database Administrators & Data Scientists · DataCamp

ADDITIONAL INFORMATION

Languages: English (Fluent) · Urdu (Fluent)
